

Universidad Autónoma de Chihuahua

Facultad de Ingeniería

Asignatura: Cómputo Paralelo y distribuido

Clave: CI871

Grupo: 8CC2

Semestre: Ago-Dic 2025

Docente: José Saul De Lira Miramontes

App para descargar imágenes

Nombre del alumno: Allan Hall Solorio

Matricula: 358909

Fecha de entrega: domingo 7 de septiembre de 2024

Objetivo

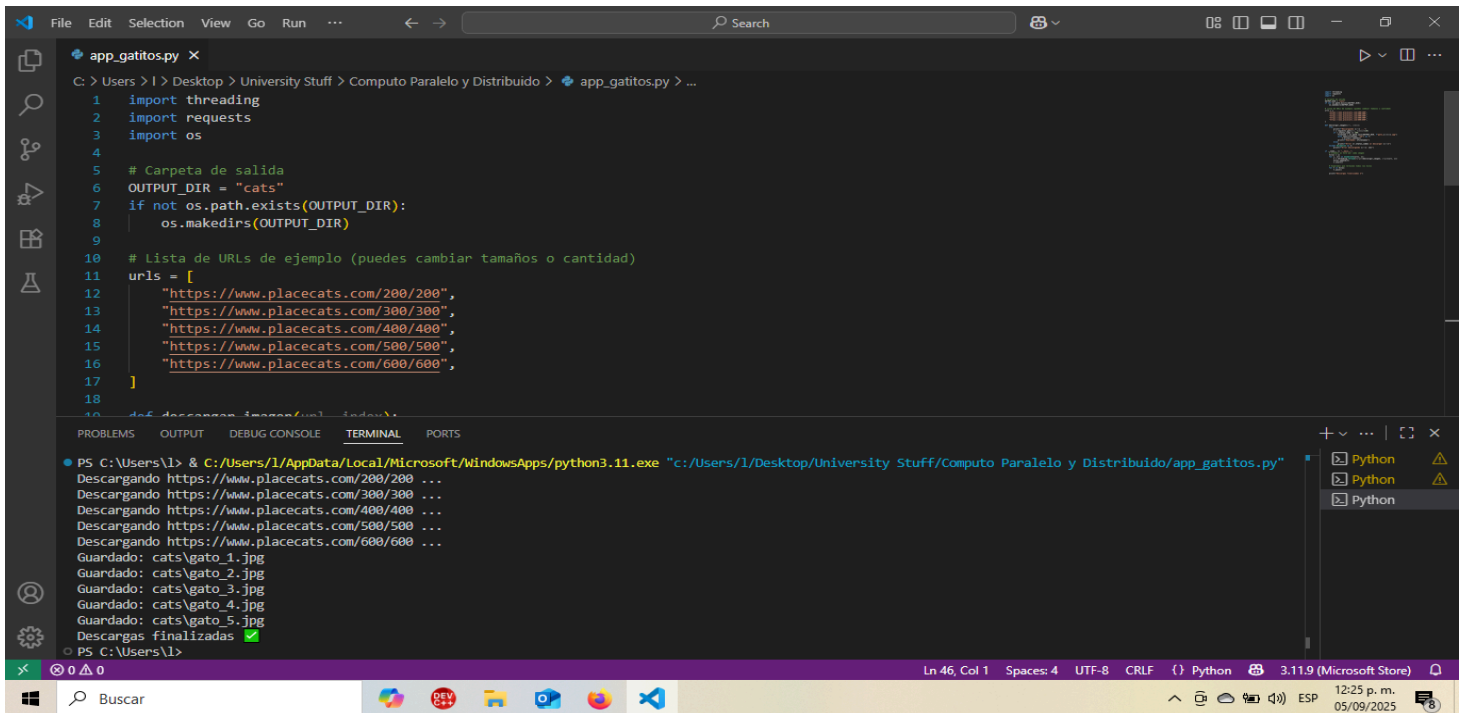

Aplicar los Threads en Python para la solución de problemas

Actividad

Desarrollar una aplicación en Python que utilice Thread que permite descargar imágenes de la web a disco

<https://www.placecats.com/>

Código funcionando:

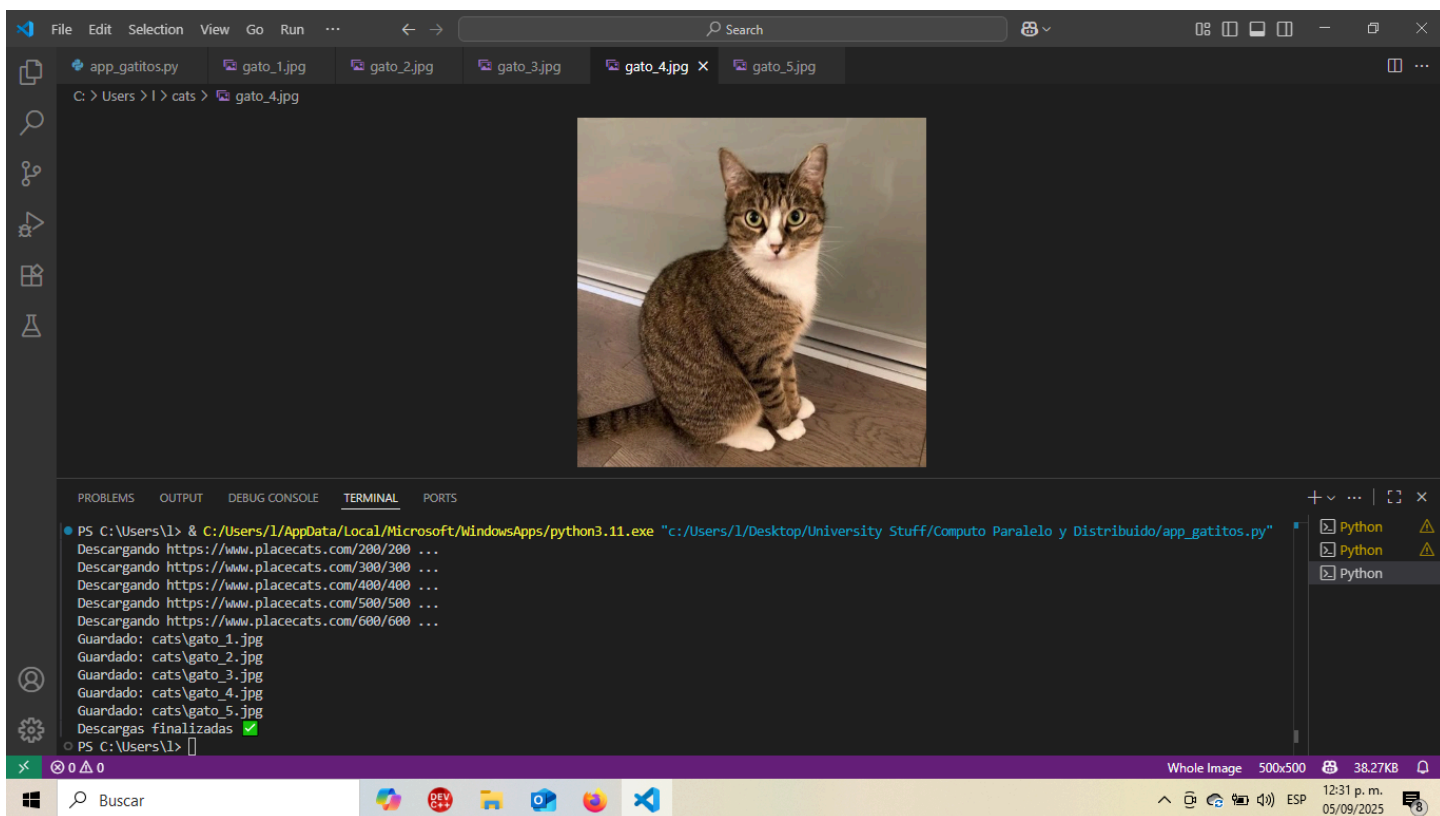

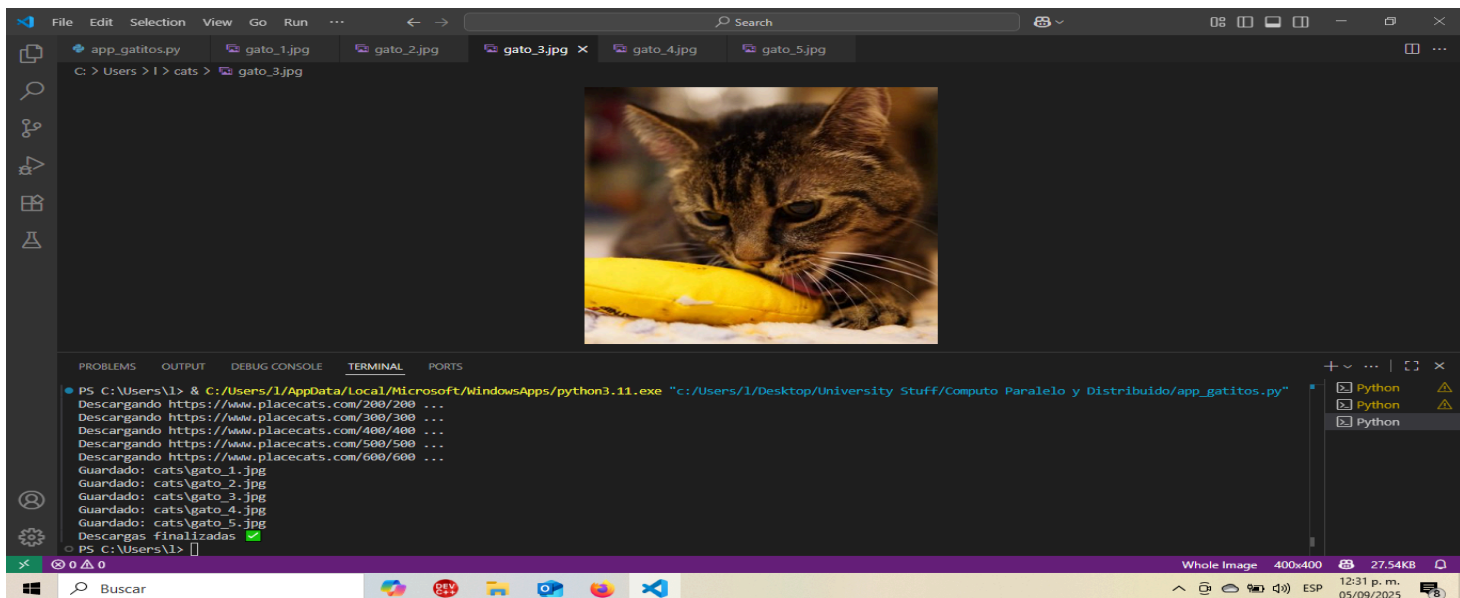

The screenshot shows a Visual Studio Code editor window with a Python file named `app_gatitos.py` open. The file is located at `C:\Users\I\Desktop\University Stuff\Computo Paralelo y Distribuido\app_gatitos.py`. The code in the file is as follows:

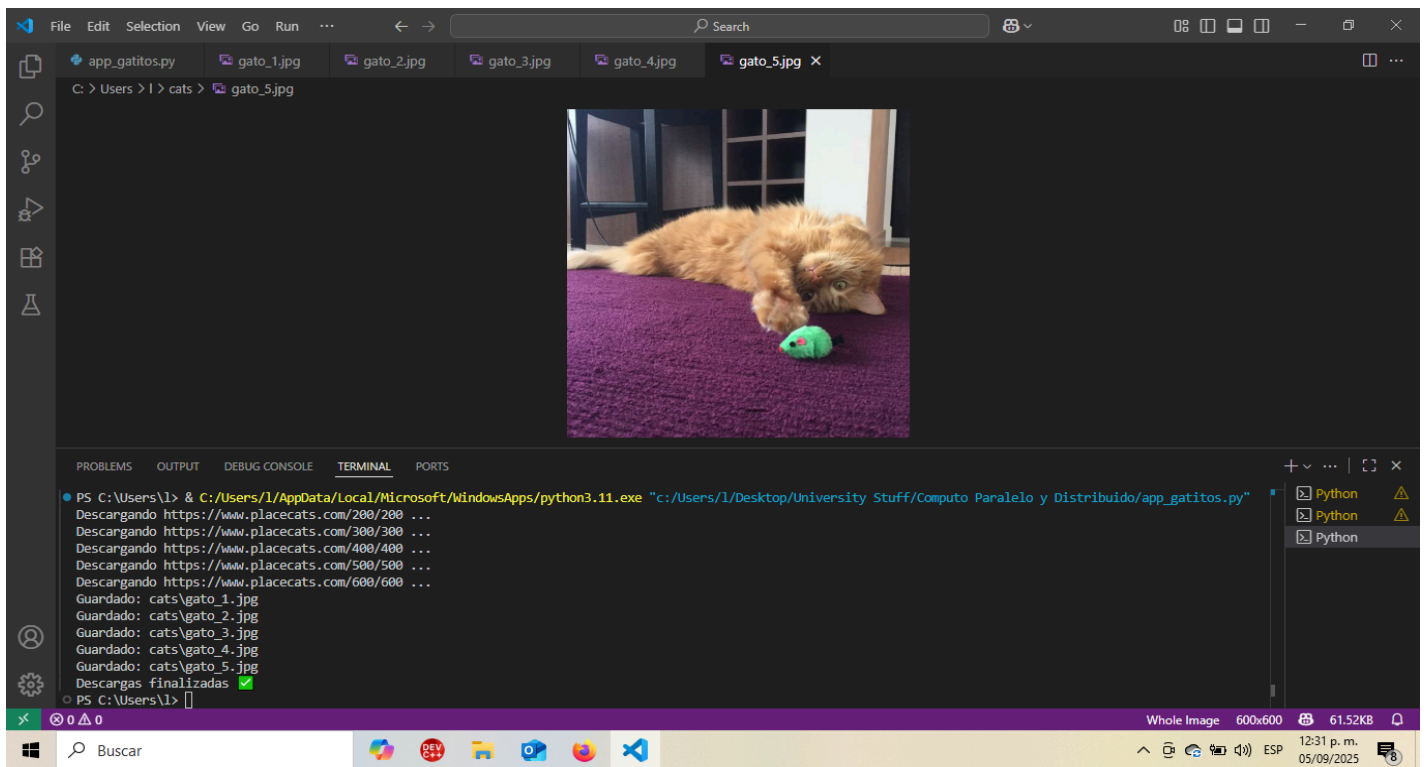

```
1 import threading
2 import requests
3 import os
4
5 # Carpeta de salida
6 OUTPUT_DIR = "cats"
7 if not os.path.exists(OUTPUT_DIR):
8     os.makedirs(OUTPUT_DIR)
9
10 # Lista de URLs de ejemplo (puedes cambiar tamaños o cantidad)
11 urls = [
12     "https://www.placecats.com/200/200",
13     "https://www.placecats.com/300/300",
14     "https://www.placecats.com/400/400",
15     "https://www.placecats.com/500/500",
16     "https://www.placecats.com/600/600",
17 ]
18
19 def descargar_imagen(url, index):
20     ...
```

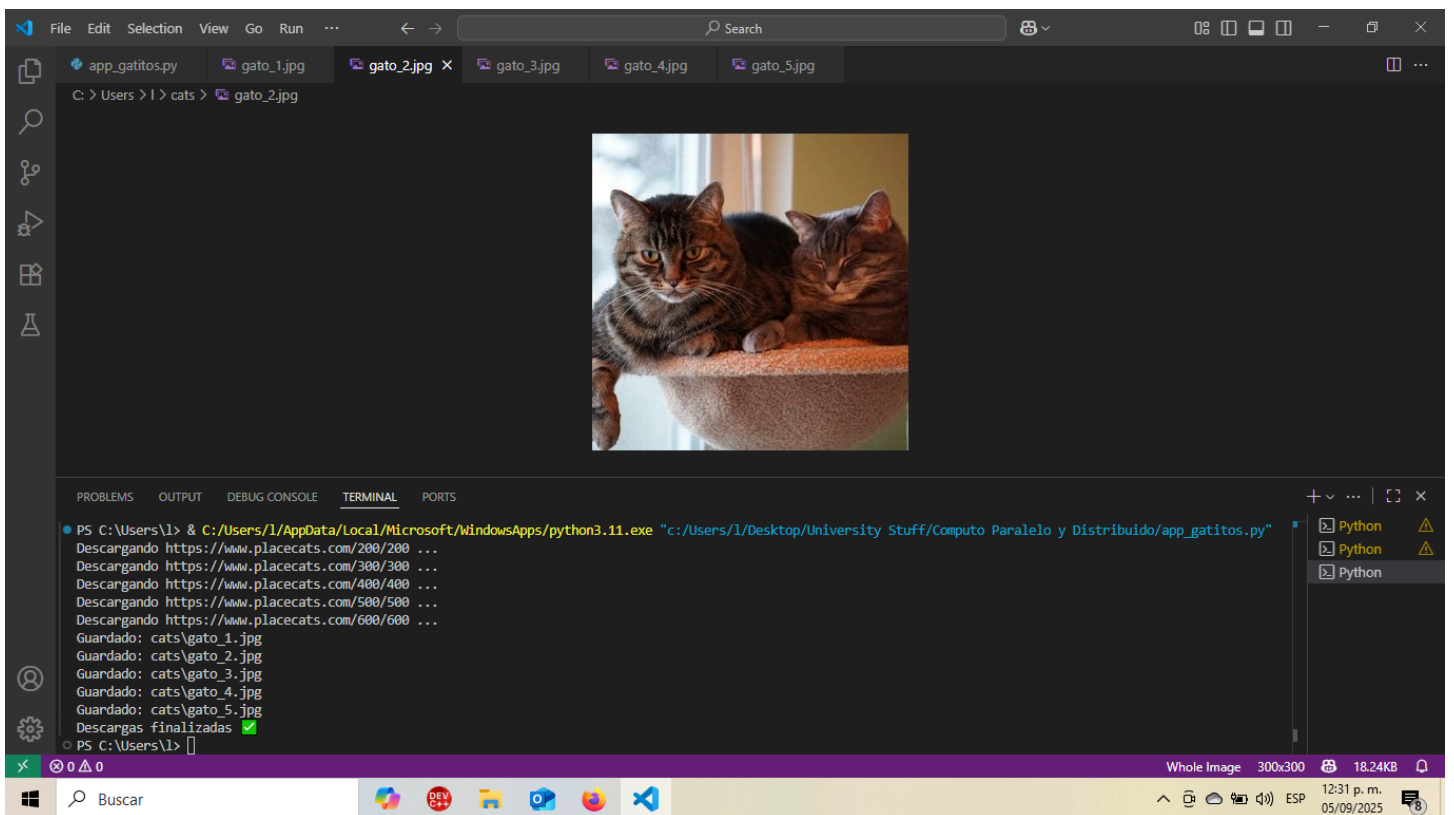

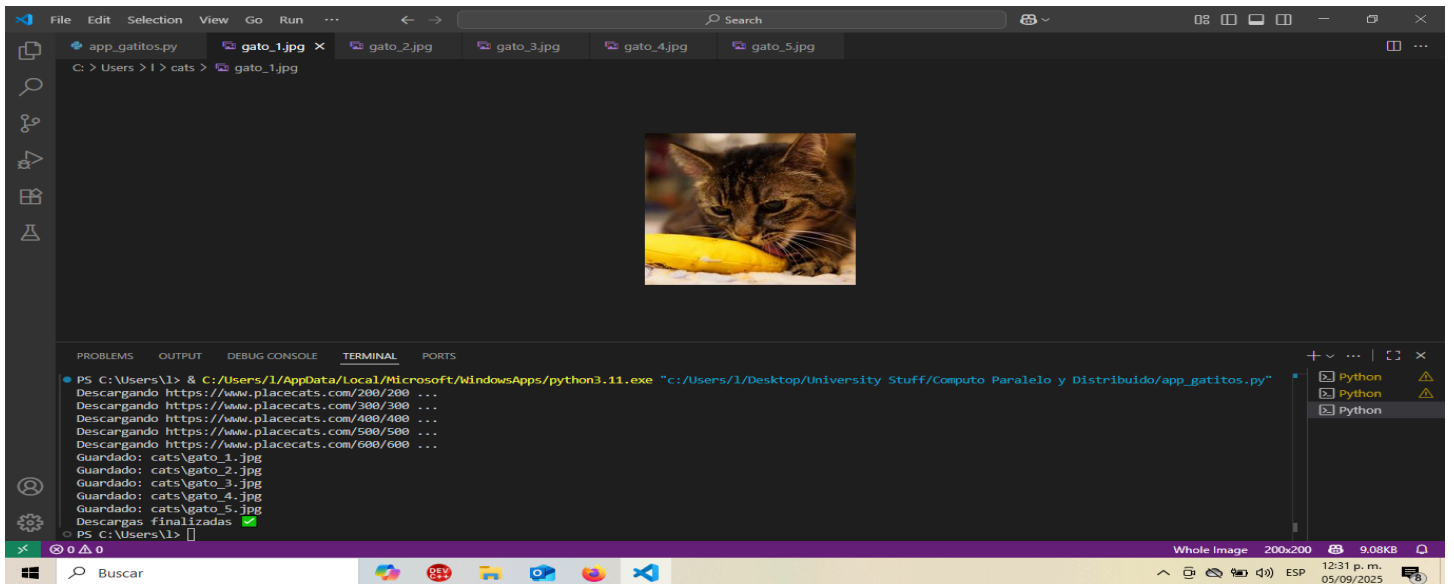

Below the code editor, the `TERMINAL` panel is active, showing the output of the script. The terminal is running a PowerShell command to execute the Python script using Python 3.11.9. The output shows the script downloading five images from the specified URLs and saving them to the `cats` directory. The process is completed successfully.

```
PS C:\Users\I> & C:\Users\I\AppData\Local\Microsoft\WindowsApps\python3.11.exe "c:\Users\I\Desktop\University Stuff\Computo Paralelo y Distribuido\app_gatitos.py"
